

16 HOW SUPPLIED/STORAGE AND HANDLING

Heparin Sodium Injection, USP is a preservative-free clear solution available as:

Product Code	Unit of Sale	Strength	Each
761805	NDC 63323-118-05 Unit of 24	5,000 USP units per 0.5 mL (10,000 USP units per mL)	NDC 63323-118-01 0.5 mL fill in 1 mL pre-filled single-dose syringe

Discard unused portion

Store at 20°-25°C (68°-77°F) [See USP Controlled Room Temperature].

Protect from freezing.

Do not place syringe on a sterile field.

17 PATIENT COUNSELING INFORMATION**Hemorrhage**

Inform patients that it may take them longer than usual to stop bleeding, that they may bruise and/or bleed more easily when they are treated with heparin, and that they should report any unusual bleeding or bruising to their physician. Hemorrhage can occur at virtually any site in patients receiving heparin. Fatal hemorrhages have occurred [see *Warnings and Precautions (5.2)*].

Prior to Surgery

Advise patients to inform physicians and dentists that they are receiving heparin before any surgery is scheduled [see *Warnings and Precautions (5.2)*].

Heparin-Induced Thrombocytopenia

Inform patients of the risk of heparin-induced thrombocytopenia (HIT). HIT may progress to the development of venous and arterial thromboses, a condition known as heparin-induced thrombocytopenia and thrombosis (HITT). HIT and HITT can occur up to several weeks after the discontinuation of heparin therapy [see *Warnings and Precautions (5.3)*].

Hypersensitivity

Inform patients that generalized hypersensitivity reactions have been reported. Necrosis of the skin has been reported at the site of subcutaneous injection of heparin [see *Warnings and Precautions (5.8), Adverse Reactions (6.1)*].

Other Medications

Because of the risk of hemorrhage, advise patients to inform their physicians and dentists of all medications they are taking, including non-prescription medications, and before starting any new medication [see *Drug Interactions (7.1)*].
