MANNITOL

INJECTION, USP

25%

12.5 g per 50 mL

(250 mg per mL)

For Intravenous Use
and Urologic Irrigation

25 x 50 mL

Single Dose Vials

Rx only

Sterile, Nonpyrogenic

Preservative Free

Discard unused portion.

Each mL contains: Mannitol 250 mg; Water for Injection q.s. 1.372 mOsmol/L (calc.) Crystals, if present, may be dissolved by placing the vial in a hot water bath maintained at 60°-80°C with occasional shaking. The resulting solution should be allowed to cool to body temperature before injection. See insert for dilution information.

Note: Use of any other method to heat the vial may result in its explosion.

An administration set with a filter should be used for intravenous infusions of solutions containing 20% or more of mannitol.

Store at 20° to 25°C (68° to 77°F) [see USP Controlled Room Temperature].
