Remifentanil Hydrochloride for Injection

2 mg per vial

Equivalent to 2 mg of remifentanil
For intravenous use only.

Rx only

10 x 2 mg Single Dose Vials

To reconstitute solution, add 1 mL of diluent per mg of remifentanil. Shake well to dissolve. When reconstituted as directed, the solution contains approximately 1 mg of remifentanil activity per 1 mL.

Remifentanil Hydrochloride for Injection should be diluted to a recommended final concentration of 25, 50 or 250 mcg/mL prior to administration. Remifentanil HCl should not be administered without dilution. See package insert.

The container closure is not made with natural rubber latex.
Sterile.

Each vial contains: Remifentanil Hydrochloride for Injection equivalent to 2 mg of remifentanil. The inactive ingredients are 15 mg glycine; and hydrochloric acid to buffer the solution to a nominal pH of 3 after reconstitution.

Usual dosage: See package insert.
