

NDC 63323-032-00

Maxivial®

Sterile

Sodium Acetate Injection, USP

400 mEq per 100 mL

(4 mEq per mL)

**PHARMACY BULK PACKAGE—
NOT FOR DIRECT INFUSION**

For Intravenous Use Only*

20 (1 x 20) 100 mL
Vials

Rx only

Each mL contains: 328 mg sodium acetate (anhydrous). May contain glacial acetic acid for pH adjustment. 8 mOsmol/mL (calc.). pH 6.5 (6.0 to 7.0).

* For preparing intravenous admixtures only.

Usual dosage: See package insert for complete dosage information and proper use of this container. Discard vial **4 hours** after initial entry. A single entry through the vial closure should be made with a sterile dispensing set or transfer device. Transfer individual doses to appropriate intravenous infusion solutions. Use of a syringe with needle is not recommended. The above process should be carried out under a laminar flow hood using aseptic technique.

STORE AT: 20° to 25°C (68° to 77°F)
[See USP Controlled Room Temperature].

Contains no more than 400 mcg/L of aluminum.

Fresenius Kabi
Lake Zurich, IL 60047
